LIFT STATIONS: 24

TREATMENT PLANT SYSTEM:

Includes: Preliminary treatment, primary treatment, biological trickling filters, secondary treatment, nitrification aeration, final clarification, sand filters, chlorination, disinfection and dechlorination.

TREATMENT PLANT PERFORMANCE

During the twelve-month period from January 1, 2012 through December 31, 2012, total flow for the wastewater treatment plant was 1,214,597,000 gallons.

During the period from January 1, 2012 through December 31, 2012, the City of Asheboro experienced one (1) overflow event at the Wastewater Treatment Plant, three (3) overflow events from lift stations and seven (7) overflow events from the collection system. This amounted to a total of 26,673 gallons of wastewater overflow from lift stations and the wastewater treatment plant and 29,622 gallons overflowing from manholes, which represents only 0.00004 percent of the total flow treated for this calendar year. There was one (1) reported permit violation for mercury and the date was: January 16, 2012.
